AREAS OF ACTIVITIES

Offer & Request

WE ARE OFFERING AGRONET SERVICES (IT SERVICES IN AGICULTURE).

We offer agroNET - a suite of advanced solutions aimed to move-up the agricultural production in different domains. It is created combining agricultural knowledge with new IoT technologies and it cover the wide spectrum of food production and consumption processes, from farm to fork. It contains several services: irrigNET - service for rational irrigation, trapNET - service for monitoring harmful butterflies activities, ekoNET - service for monitoring environmental conditions, pestNET - service for early detection of rodents activities, growNET - service for field monitoring and Pijacanaklik - platform for connecting agricultural producers and consumers. We are looking for partners willing to use or to distribute agroNET services.
